IMPORTANT SAFETY RULES TO FOLLOW

1. Load 60% of weight forward of centerline.
2. Do not overload. Check weight capacity of trailer before loading. These trailers are not intended for hauling dirt, rocks, sand, sod, bricks, gravel, broken concrete or scrap iron.
3. Maximum speed limit is 55 miles per hour.
4. One safety chain must run through the winder handle, the winder must be hand tight only. Never over tighten the winder (the hitch must be able to swivel). If there is only one safety chain it must be hooked to passenger side of vehicle.
5. It is against the law to ride on the trailer.
6. All trailers are for use within a 100 mile radius from our outer most location.
7. Load must not extend more than 3 feet from the rear of the trailer.
8. Check the hitch installation frequently and especially after loading and unloading the trailer.
9. Vehicles towing trailers are required by law to drive in the right lane except when passing.
10. Trailer brake lights, taillights and turn signals are required to be connected and operational at all times.
11. Mirrors are required on both sides of the tow vehicle if the trailer or its load obstructs vision to the rear.
12. Obey all traffic laws, secure all loads, allow extra distance for stopping and allow extra travel time.

Special Note: When loading or unloading the trailer, block the tires. Most vehicles parking brakes work only on the rear axle. Weight on the rear of the trailer can cause the rear of the tow vehicle to become lighter and the parking brake may become ineffective.
