

## **WARNING TURBO FAN**

Any piece of equipment can be dangerous if not operated properly. **YOU** are responsible for the safe operation of this equipment. The operator must carefully read and follow any warnings, safety signs and instructions provided with or located on the equipment. Do not remove, defeat, deface or render inoperable any of the safety devices or warnings on this equipment. If any safety devices or warnings have been removed, defeated, defaced or rendered inoperable, **DO NOT USE THIS EQUIPMENT!!!**

**⚠ WARNING:** Plastic cases and product plastic housings made from polycarbonate or other plastics can expose you to chemicals including bisphenol A, which are known to the State of California to cause cancer and birth defects or other reproductive harm. For more information, go to [www.P65warnings.ca.gov](http://www.P65warnings.ca.gov)

**APPLICATION:** TurboDryers are designed to deliver a high-volume laminar airflow over or under wet surfaces for speed drying. Airflow speeds the rate of evaporation, helps prevent mold growth, and reduces the risk of secondary damage. Circulating air speeds evaporation by removing the “boundary layer” of saturated air that hangs near wet surfaces. The moist air is whisked away and replaced with dryer air. Place at least one TurboDryer in each room or one for every 300 square feet. Ensure that all affected area have good airflow. Open doors and operate TurboDryers to maintain good air circulation. Doors may need to be braced to prevent them from closing as a result of air movement.

### **IMPORTANT SAFETY RULES TO FOLLOW**

1. Keep TurboDryers grounded. Do not alter the three-pronged grounded plug for any reason.
2. When using TurboDryers outside do not use an extension cord and only use with a GFCI PROTECTED RECEPTACLE.
3. Keep away from heaters. Do not use TurboDryers for circulating hot air by placing the intakes close to a heater. The housing could melt or the motor could overheat and cause a fire.
4. Keep away from combustible gas. This could cause a danger of fire or explosion.
5. Never operate the machine without the inlet screen in place. Always keep it clear!
6. Avoid gaseous area. Do not operate machine in explosive atmospheres in presence of flammable liquids or gases. This motor creates sparks, which could ignite fumes.
7. Don't Abuse Cord - Never carry tool by cord, or yank it to disconnect from receptacle.

If the person receiving this handout will not be the user of the equipment, forward these instructions to the operator. If there is any doubt as to the operation or safety of the equipment,

**DO NOT USE!!! CALL A TOOL SHED IMMEDIATELY!!!**

**FAILURE TO FOLLOW THESE INSTRUCTIONS COULD RESULT IN INJURY OR DEATH**
