

## WARNING 2” PIPE REAMER

Any piece of equipment can be dangerous if not operated properly. **YOU** are responsible for the safe operation of this equipment. The operator must carefully read and follow any warnings, safety signs and instructions provided with or located on the equipment. Do not remove, defeat, deface or render inoperable any of the safety devices or warnings on this equipment. If any safety devices or warnings have been removed, defeated, defaced, or rendered inoperable, **DO NOT USE THIS EQUIPMENT!!!**

 **WARNING:** This product can expose you to chemicals including Chromium from steel products, which are known to the State of California to cause cancer and birth defects or other reproductive harm. For more information go to [www.P65warnings.ca.gov](http://www.P65warnings.ca.gov)

 **WARNING:** This pipe reamer can expose you to chemicals including naphthalene and sulfur from cutting oil products which are known to the State of California to cause cancer and birth defects or other reproductive harm. For more information go to [www.P65warnings.ca.gov](http://www.P65warnings.ca.gov)

A pipe reamer is a helpful tool for plumbers and DIY homeowners that are working with plumbing pipe and other metal tubing. A pipe reamer's basic job is to remove burrs from the inside of pipes. This pipe reamer is used manually, with its ratcheting handle. If you have been working on a project involving the use of pipe, a pipe reamer can help you clean up your work and make the holes smooth and free of burrs or metal shavings.

### Step 1

Match the reamer to your pipe. This pipe reamer is for 1/8” to 2” pipe.

### Step 2

Fit the pipe reamer into the pipe until it fills the pipe. Pipe reamers are shaped like a cone, so the tip will have a smaller diameter than the base. Insert it into the pipe until the reamer's diameter is flush with the diameter of the pipe.

### Step 3

Turn the ratcheting handle clockwise to begin reaming the hole. Depending on the size of the burr, this process may take a few minutes or longer. **ALWAYS** turn the reamer clockwise, never counterclockwise even when removing the reamer from the pipe.

### Warning

Ensure you wear appropriate eye protection when using a pipe reamer. Metal shavings can splinter off and end up in your eye. Also wear heavy work gloves to protect your hands from the sharp edges of the reamer as well as the sharp metal shavings.

If the person receiving this handout will not be the user of the equipment, forward these instructions to the operator. If there is any doubt as to the operation or safety of the equipment, **DO NOT USE!!! CALL A TOOL SHED IMMEDIATELY!!! FAILURE TO FOLLOW THESE INSTRUCTIONS COULD RESULT IN INJURY OR DEATH**
